boo bunny plague - deluxe edition

it is fun a and the music is good
i recommend it and if u need more info
u get to make a robot bunny beat up a dinosaur. Humorous, fun, and epic. Loved the soundtracks. Sure, most of the game seems like something queer and odd, but hey, I can promise you you'll have fun!. As much as the music is pretty funny, the gameplay is very simple and the story itself while odd and funny, is lacking a lot of gameplay. i only played the first two levels and was turned away from the lack of the city's boring out of place theme. the music is the only good thing ive seen in the game. 2\/10 rating in my eyes, but then again, im just one person. Deadpool got dominated by a robot rabbit. the songs, welp there some thats is epic and there some that is meh eh rather not so buy at your own risk. So I Downloaded This DLC And Wean i Went To Go See If This Worked I Did Not See A Thing (Inculding The DLC) So I Think This Is Not Worth A Cent. But The Game Is Decent So You Sould Get The Game But Not This DLC So Yeah.

though you have to pull up the game file location to access it having the comic and soundtrack is awesome
